DETAILED ACTION

Claims 17-21 are examined in this Office Action.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 17-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hab-Umbach et al. (5,950,166).

Hab-Umbach et al. teaches an acoustical function control device in a motor vehicle using speech input system (please see the abstract) to receive a spoken command and to convert the spoken command into corresponding control signal (please see fig. 1 and fig. 4). Hab-Umbach et al. teaches the claimed device except for the method as claimed. Method as claimed are deemed obvious in view of the functions of the structure in the combination as disclosed by Hab-Umbach et al.
